## March 2017 Newsletter

Volume V Issue 3

Van Cleve & Associates, Inc.'s monthly newsletter is intended to keep you, our valued customer, up to date with announcements regarding our latest products and technologies, upcoming exhibitions and conferences, and other news and events in the security and surveillance industry.

### VC&A Teaming as Operational Sponsor on Cyber Security Forum Initiative (CSFI)

Van Cleve & Associates, Inc. is proud to announce it has been added as an Operational Sponsor with the Cyber Security Forum Initiative (CSFI), and in particular, CSFI's Cyber Warfare Division (CWD).

Headquartered in Washington, DC, CSFI is a non-profit consortium of nearly 81,000 cyber security and cyber warfare professionals. Its chief mission is to provide cyber security awareness, guidance, and security solutions through collaboration, education, volunteer work, and training. CSFI's Cyber Warfare Division (CWD) focuses on the Cyber Warfare domain, tactics, techniques, strategies, and methods.

Of great interest to CSFI is a line of portable data centers from VC&A that are designed for use by cyber teams for rapid deployment applications. Portability is based on a server the size of a credit card. This technology supports CSFI's mission as it relates to training and CTF (capture-the-flag) engagements by providing cutting-edge technologies used by organizations such as the US Special Forces.

Please contact VC&A for additional information on these or any of our products, or to schedule a demo.

### PELCO Pelco Launches Security Insights Website

The new website is designed to provide integrators, resellers and end-users with valuable content, such as articles, studies, and more, related to the world of video surveillance. Check it out at: [securityinsights.pelco.com](http://securityinsights.pelco.com)

### Top 6 Ways to Reduce Video Surveillance Cyber Security Risks

- 1. Camera Passwords Matter:** Change the Default Password!
- 2. Isolate Your Cameras:** Put them on their own network.
- 3. Lock Down the Network:** Use MAC Binding
- 4. Two Operators = Less Risk:** Have one user and one admin
- 5. Don't Ignore Unusual Events:** It may be a sign of a hacking attempt
- 6. Purchase Cameras from a Company with a Reputation for Security**
