

# CAPABILITY STATEMENT

## CORE COMPETENCIES

- IP cameras produce high definition digital audio and video recording
- Multiple cameras and microphones per room for redundancy and clarity
- MP4 file format enables viewing by wide base of applications
- Network based client server architecture enabling:
  - Multiple authorized users to interact with recorded interviews
  - Control and viewing of up to 16 interview rooms from one or multiple locations
- Automatically generated metadata
- Activity logs to track chain of custody
- Secure hash algorithm applied to video and audio
- Flagging and annotating for fast review of video
- Live monitoring via local area network
- Remote activation of all recording devices
- Redundant recording and auto back up
- Encoding of all video assets
- 5-year warranty included

## DIFFERENTIATORS

- Allows agents to review a large number of interviews involving multiple subjects in a user-friendly and intuitive manner
- Designed specifically for recording and managing investigative interviews
- Product evolution over 15 years based on investigator feedback
- Linux based software provides security and reliability
- Permanent, portable and compact systems offered
- On-site, online and recorded training
- Annual feature enhancements
- Flexible software licensing models—only pay for the rooms being used

## SELECT PAST PERFORMANCE

**2008–Present:** Naval Criminal Investigative Services
